Healthcare Risk Management and Safety Workshop

Patient safety and risk management are no longer just reactive measures – they are proactive imperatives for every healthcare professional. This workshop dives into the heart of modern risk management, equipping you with the tools and strategies to identify, prevent and mitigate risks before they escalate.

Join us to explore a systems-based approach that not only meets accreditation standards but also fosters a culture of safety, quality and continuous improvement in healthcare.

What You'll Learn:

Understand systemic processes and latent factors in adverse events, and apply root-cause analysis (RCA) tools

Classify error types and explore human factors contributing to safety risks.

Analyze case studies to practice RCA principles and develop actionable solutions for risk mitigation.

Who Should Attend:

- Allied Health Professionals
- Biomedical Engineers
- Chief Nursing Officers
- Clinicians
- Facility Managers
- Hospital Administrators (CEO/COO/CMO)
- IT Managers
- Medical Directors
- Nursing Managers
- Patient Safety Officers
- Pharmacists
- Risk and Quality Managers

About ECRI
ECRI is an independent, nonprofit organization improving the safety, quality, and cost-effectiveness of care across all healthcare settings. With a focus on technology evaluation and safety, ECRI is a trusted expert for healthcare leaders and agencies. ECRI acquired The Institute for Safe Medication Practices (ISMP) in 2020 to reduce and prevent medication errors; then acquired The Just Culture Company in 2024 to transform healthcare workplace cultures – thus creating one of the largest healthcare quality and safety entities in the world.
