Safety for You and the Child in You

WORLD PATIENT SAFETY - 2021 - Safe Maternal & Newborn Care

Safe maternal and newborn care is thus a holistic approach which will involve partnering with families and healthcare providers to ensure the mother and the child in her stays safe for a healthier tomorrow.

1

Before, during and after childbirth all women have the right to high quality care.

2

Partnering with families to support child birth process and supporting care of newborn.

3

Optimizing nutrition for the mothers ensures healthy breastmilk for the newborn and faster recovery post delivery.

4

Positioning & handling of the newborn to ensure safe care.

5

Safeguarding sleep for the health and well being of the mother and newborn.

6

Minimizing stress & pain for the mothers to ensure good mental health.

7

Educate new mothers to look for warning signs in pregnancy, during child birth, 6 weeks postnatal / post abortion.

8

Educate mothers and familes to follow COVID apropriate behaviour during this pandemic time for the safety.
